Professional experience

2023

●

Lead Frontend Software Engineer

Confidential client, Remote

As the lead software engineer for a full-stack web application, I collaborated closely with cross-functional teams to craft and deploy user interfaces. My role encompassed technology stacks including Next.js 13, TypeScript, Firebase, Stripe, and proficiency in design tools like Figma and Lucidchart. Additionally, I actively contributed to team growth through onboarding and mentorship initiatives, and project management using Git and Jira.

2023

●

Frontend Developer

dataJAR, Brighton

At dataJAR, an Apple device management company focused on user success with Apple products, I served as the Frontend Developer for the .mobi portal. My primary responsibility was to collaborate closely with the product team to enhance the user experience and reactivity of the existing Django application by implementing a new Vue.js frontend. I leveraged a range of technologies, including Vue 3 options API, Axios, Chart.js, Git, and design tools like Lucidchart and Figma. This role allowed me to drive significant improvements in the portal's performance and usability.

2022

●

UX Engineer

Prodia, Remote

At Prodia, a pioneer in applying generative AI to crypto mining, I collaborated closely with the engineering and product teams to bring the Prodia application to fruition. My contribution was particularly notable for significantly enhancing the iteration time of product versions. In this capacity, I leveraged cutting-edge technologies, including CSS3, Vue 3 composition API, and TypeScript, to drive the development and optimization of the application.

2021

●

Frontend Developer & UI/UX Designer

Contract, Remote

As a freelancer, I've had the privilege to engage in a diverse array of exciting projects. These encompassed designing and developing the online platform for Dismiss Yourself, orchestrating the complete reconstruction of a prominent entertainment platform, leading the charge in establishing the digital presence and branding for Legendary Security, crafting a stunning portfolio for the highly talented Brighton-based songwriter, Annabel Curphy, and tackling numerous other innovative ventures.

Throughout my freelancing journey, I've harnessed a wide spectrum of technologies to bring these projects to life. My toolkit includes Vue.js, React.js, Next.js, JavaScript, TypeScript, Node.js, Firebase, HTML5, CSS3, TailwindCSS, Sass, GSAP, Git, Jira, and Figma.

2019

●

SIA Security Officer

Legendary Security, Brighton, UK

As security personnel for Legendary Security my responsibilities included safeguarding customers and staff, resolving conflicts, working within a team and maintaining composure in high-pressure situations.
