Professional experience

2023 ● **UX Engineer**

Prodia, Remote

Prodia is bringing generative AI to crypto mining, I worked alongside the engineering and product team to help the Prodia application come to life. My direct report noted that I helped significantly improve the iteration time of product versions. In this role, I used technologies such as HTML, CSS, Vue 3 Composition API, ci/cd tooling, and TypeScript.

2022 ● **Web Developer & Brand Designer**

Legendary Security, Brighton, UK

Company website and branding for a Brighton based security agency, responsibilities included efficient communication with the client to explore design and development visions and meet the practical requirements of the business website using Figma, HTML, CSS, JavaScript, SEO principles and working with a copywriter.

2022 ● **Frontend Engineer & UI/UX Designer**

Dissmiss Yourself, Remote

Mainsite for US based record label Dismiss Yourself, responsibilities included working within a development team to meet design expectations and implementation of all design elements using Figma, HTML, CSS, Vue.JS options API, Sanity CMS and JavaScript.

2022 ● **Web Developer & UI/UX Designer**

Annabel Curphey, Brighton, UK

Portfolio website for a Brighton based songwriter, responsibilities included working closely with the client to realise design expectations and implementation of all design and animated elements using Figma, HTML, CSS, JavaScript and Intersection Observer API.

2022 ● **SIA Door Supervisor**

Legendary Security, Brighton, UK

As security personell for Legendary Security my responsibilities included safeguarding customers and staff, resolving conflicts, working within a team and thinking and acting rationally in high-intensity situations.

2018 - 2022 ● **Music Producer**

Brighton, UK

As a music producer for a multitude of artists I worked to realise artistic vision through use of audio software and hardware to produce, mix and master music.
