Professional experience

2022 ● **UX Engineer**

Prodia, Remote

Prodia is bringing generative AI to crypto mining. I worked alongside the engineering and product team to help the Prodia application come to life. My direct report noted that I helped significantly improve the iteration time of product versions. In this role, I used technologies such as CSS3, Vue 3 composition API and TypeScript.

2021 ● **Frontend Developer & UI/UX Designer**

Contract, Remote

As a freelancer, I have had the opportunity to work on a variety of exciting projects. These include designing and developing the home for Dismiss Yourself, spearheading the digital presence and branding for Legendary Security, creating a portfolio for the talented Brighton-based songwriter Annabel Curphy and numerous other projects.

In my work, I have utilised a range of technologies including Vue.js, JavaScript, HTML5, CSS3, Sass, GSAP, Git, and Figma.

2019 ● **Bartender, SIA Security Officer**

OTR / Legendary Security, Brighton, UK

As security personell for Legendary Security my responsibilities included safeguarding customers and staff, resolving conflicts, working within a team and thinking and acting rationally in high-intensity situations.

Soft Skills / Extras

- Professional remote communication setup

- Audio production / sound design
